SUPERVISORY PATENT EXAMINER

## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-17 are allowed.
2. The following is an examiner's statement of reasons for allowance: Claims 1-10 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 9 wherein the charge pump alternately charges and discharges a charge storage component (Cx), wherein the charge storage component (Cx) is coupled in series with the supply voltage and the first load to discharge the charge storage component (Cx) and to provide power to the first load, and wherein the charge storage component (Cx) is coupled in series with the supply voltage and the second load to charge the charge storage component (Cx) and to provide power to the second load (this is seen to be accomplished through the control of switches S1-S4) in combination with the rest of the limitations of the base claims and any intervening claims. Claims 11-17 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 9 wherein the plurality switches (S1-S4) alternately couple the charge storage device (Cx) in series with the supply voltage to a first load and to a second load, wherein the charge storage device (Cx) charges when the charge storage device (Cx) is coupled to the second load and discharges when the charge storage device (Cx) is coupled to the first load in combination with the rest of the limitations of the base claims and any intervening claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
